

Harvia LTY17 and LTY17C power extension units

Harvia LTY17 and LTY17C

Power extension units for expanding output range of control units

Applications:

- Controlling the most powerful Harvia heaters (Virta HL220, Elegance F18, Profi) with stylish and modern Griffin and Xenio control units
- Budget solutions in combination with C90 and C105S control units
- Controlling two separate heaters with a single control panel

LTY17 is for normal sauna heaters and LTY17C is for Combi heaters. A power extension unit only works in connection with C90, C105S, Griffin and Xenio control units, not as a stand-alone unit.
